Power Paddle

Biofuse Power Paddles create water resistance, making your arms, shoulders and back work harder for improved speed, muscle strength and stroke technique. Increase distance per stroke - Power paddles encourage high elbows and proper hand entry into the water, making stroke technique more efficient. This conserves energy which is crucial for long distance swimming. Upper body strength - Power paddles increase the surface area of the water you catch, which increases resistance, improving your strength and endurance.

Swimwear After Care

To ensure your swimwear lasts as long as possible, see these small steps on how you can care for your swimwear...

- Rinse immediately in clean cold water after use. Chlorine will damage the suit over time.

- Lay flat in a warm environment and avoid direct lengthy exposure to the sun.

- Avoid contact with direct heat. Keep away from the radiator and do not iron.

- Gently squeeze the suit to remove excess water or use a spinner at your local pool.

- Be careful where you sit. If possible, try to sit on a towel as pool side and decks can be abrasive which may snag the suit.

- Follow the washing instructions on the care label after each use.
